

Asbestos Consulting Services

Clean, Safe and Legal Removal of Asbestos

Asbestos is still used in some building materials sold in the United States today. TRC staff can help ensure that replacement materials are asbestos-free and break through the confusion of conflicting regulations.

TRC provides clients with all aspects of asbestos consulting services. Our services range from small-scale abatement monitoring to comprehensive multi-site asbestos management programs. Our projects include a variety of building structures and encompass work performed for property transactions, facility management, renovation and demolition activities. TRC has EPA-trained and state-licensed asbestos inspectors, management planners, project designers, project monitors, air sampling professionals and contractor/supervisors. TRC's accredited in-house laboratory offers cost-effective, quick turnaround of both bulk asbestos and air sample analysis.

Our asbestos services include:

- ACM management program development, audits and evaluations
- Comprehensive ACM visual surveys and bulk sampling
- In-house analysis of suspect ACM bulk material and air samples
- Hazard assessments to identify the potential for exposure or future disturbance
- Design of abatement projects including plans, specifications and preparation of Alternative Work Practice (AWP) applications and variances
- Cost estimation services
- Development/implementation of asbestos operations and maintenance (O&M) plans
- Construction administration including assistance with contractor evaluation and selection, contract execution, project management services, project monitoring and air monitoring during all phases of abatement
- On-site or laboratory air sample analysis
- OSHA asbestos awareness and O&M training

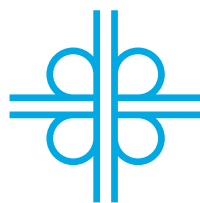

About TRC

Groundbreaker. Game changer. Innovator. TRC is a global firm providing environmentally focused and digitally powered solutions that address local needs. For more than 50 years, we have set the bar for clients who require consulting, construction, engineering and management services, combining science with the latest technology to devise solutions that stand the test of time.

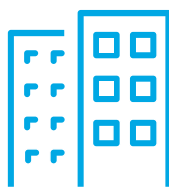

TRC's nearly 6,000 professionals serve a broad range of public and private clients, guiding complex projects from conception to completion to help solve the toughest challenges. We break through barriers for our clients and help them follow through for sustainable results.
